

PA 513: Collaborative Management and Governance Networks

FALL 2026

Michael D. Siciliano
office: 2116 AEH
ph: 312-413-5177
email: sicilian@uic.edu

Class time and room: Thursdays, 12:30 – 3:00 in AEH 2203; This is an 8 Week Course (8/24 – 10/16)

Office Hours: Happy to meet at any time. Email me to set up a convenient time.

I. RATIONALE AND COURSE OBJECTIVES:

While the terms collaborative public management and governance networks are relatively new in our field, collaboration in the public sector has existed for centuries. Elazar's (1962) research found evidence of federal-state cooperation going back to the start of the U.S. federal system. This course examines collaboration and coordination within the context of governance networks. Governance networks have been defined as 'more or less stable patterns of social relations between mutual dependent actors, which form around policy problems and/or cluster of means and which are formed, maintained, and changed through a series of games' (Koppenjan and Klijn 2004 p. 69-70). These social relations include private organizations, nonprofits, state/federal/local governments, and citizen groups. We will also explore street-level networks comprised of bureaucrats charged with implementing policy.

Markets and hierarchies remain dominant forms of organization, but recent trends have increased the applicability and visibility of networks for the creation and administration of public policies. These trends include greater levels of contracting out and devolution, coupled with the increasing size, scope, and complexity of modern public policy problems. Complex policy issues (often termed 'wicked problems') inherently cross organizational and jurisdictional boundaries. Given that many public programs and policies are developed and implemented through networks of both public and private actors, several critical questions arise for public administration and public management scholars. Are network forms of organizing more effective and efficient than traditional bureaucratic and hierarchical structures? How should performance be measured in a system comprised of multiple organizations with different conceptions of success and varying levels of resources and commitment? What drives these networks to

come together, and what facilitates and constrains their maintenance? What types of structures and governance mechanisms have and can be used?

Governance networks also adjust the traditional functions of public managers. Managing in multi-organizational collaborative arrangements entails a shift from 'command and control' strategies often used in hierarchies to the development of facilitation and coordination strategies to establish partners and share resources. A major concern arises in governance networks with regard to accountability and "democratic anchorage." Sorenson and Torfing (2005) state that "governance networks are democratically anchored to the extent that they are properly linked to different political constituencies and to a relevant set of democratic norms that are part of the democratic ethos of society." We often deem our political institutions as democratic due to representation of democratically elected leaders. However, governance networks may be dominated by non-state actors and thus serious questions of representation and accountability arise.

In this course, we will explore research and thinking on collaborative management and governance networks and think critically about the questions and issues raised above. Readings will span classic works from other fields to recent articles not yet in print. I hope that you enjoy this course and look forward to learning alongside you.

II. TEXTS

There is only one assigned book for the course. The majority of readings will come from journal articles, book chapters, reports etc., and will be made available to you online. The one required text is:

Koliba, Christopher, Jack W. Meek, and Asim Zia. 2018. *Governance Networks in Public Administration and Public Policy*, 2nd ed. Boca Raton, Fla.: CRC Press. [First edition is fine]

In addition to the required readings, a list of recommended readings is offered each week below. These lists are rather extensive and designed to give you an opportunity to explore other related topics and contexts (most likely after you have finished this course). In addition, I would like to specifically suggest a few other books that you may want to consider adding to your collection.

Emerson, Kirk, and Tina Nabatchi. 2015. *Collaborative governance regimes*. Washington, DC: Georgetown University Press.

Klijn, E. H., Koppenjan, J., Spekkink, W., & Warsen, R. (2025). *Governance Networks in the Public Sector* (2nd ed.). Routledge.

Kapucu, N., & Hu, Q. (2020). *Network Governance: Theories, Frameworks, and Applications*: Routledge.

III. REQUIREMENTS AND GRADES

There are three main components to this course:

Article Syntheses/Lit Reviews – each week, we will read 5-7 articles on a topic related to collaborative management and governance networks. Your job is to prepare a short (~ 1.5 pages, single-spaced) paper that critically reviews and integrates the week's readings. This assignment is designed to help you better understand and frame your position on particular topics and assist you in writing literature reviews for your own research and publications. In these reviews you should consider: (1) how the readings fit into the broader topic of network governance, (2) the research questions and hypotheses developed (pay attention to the rationale for the hypotheses), (3) the frameworks and theories used and/or developed, (4) methodology and data, (5) major conclusions, points, propositions, and (6) potential gaps or limitations, areas for future research, etc. Given that we only have 1.5 pages, you cannot discuss all aspects of the articles, and I do not want you to simply provide a summary of each. In your literature review, I want you to identify a theme, topic, or idea that interests you and make a broader claim or point about that issue. You can't cover everything; you need to be selective and find a vein of inquiry you want to pursue. For useful information on writing syntheses, see: <https://writingcenter.uagc.edu/synthesis>

New Article Presentations – Each week, 1 or 2 students will be asked to select an additional reading from the recommended reading list and present that reading to the class. I will help you with your selection and have flagged the most relevant articles in the recommended list with a '*'. In your presentation, you will want to make connections to the current readings and, where applicable, prior readings. The objective is twofold. To expand the number of articles we are exposed to and to help students learn how to present complex theoretical and empirical material to others. Your presentation should be 8-10 minutes long. NOTE: You are not required to submit an article synthesis on the day you present a new article.

Final Paper – This is a short course on a large and growing topic. The final paper is designed for you and a classmate to explore areas of network governance in greater detail. There are three options for this paper. The first allows you to examine the role of governance networks within a particular policy area (e.g. economic development, emergency management, environmental sustainability, education, public health, terrorism etc...). What does a network or collaborative management lens add to the study of this policy area? What are the central questions? What are the primary theories, units of analysis, main findings, etc? The second option allows you to explore a more general topic on governance, whether discussed in class

or not (e.g., social capital, structural embeddedness, complexity, trust, network evolution, network effects, dark networks, collaboration in hierarchical systems, etc.). For these first two options, you will conduct a thorough literature review of work in the area, synthesize the relevant studies and findings, and then propose a research design to address gaps or add to the extant knowledge. The third paper option is to conduct a case study of an existing governance network, in particular, a purpose-oriented network (PON). The case study will require you to gather relevant documents, conduct interviews, and summarize the network's basic features (accountability mechanisms, modes of interaction, performance measures, etc.). Students will need to select a topic for the final paper by the fourth week of the course. Additional directions and guidance will be given during class. Paper Length: 3,000 to 4,000 words. You will work in teams of two.

Component	Percentage of overall grade
Article Syntheses/Lit Reviews (5 in total; due weeks 2, 3, 4, 5, 6, 7 [no synthesis due on your article presentation week])	40
New article presentations (1)	10
Final Paper	40
Class Participation	10

IV. WEEKLY SCHEDULE (readings subject to change)

Week 1 – August 27

Topics: Networks as a form of organization. Networks in public administration. Challenges and research questions. Brief overview of social network analysis.

Readings:

Koliba et al. Chapters 1 & 2

Borgatti, Stephen P., and Pacey C. Foster. 2003. The Network Paradigm in Organizational Research: A Review and Typology. *Journal of Management* 29 (6):991-1013.

Isett, Kimberley R., Ines A. Mergel, Kelly LeRoux, Pamela A. Mischen, and R. Karl Rethemeyer. 2011. Networks in Public Administration: Understanding Where We Are and Where We Need to Go. *Journal of Public Administration Research and Theory* 21 (suppl1):i157-i173.

O'Toole, Laurence J., Jr. 2015. Networks and Networking: The Public Administrative Agendas. *Public Administration Review* 75 (3):361-371.

- Podolny, Joel M, and Karen L Page. 1998. Network forms of organization. *Annual review of sociology* 24 (1):57-76.
- Siciliano, M. D., Wang, W., Hu, Q., Medina, A., & Krackhardt, D. (2022). Networks in the Public Sector: A Multilevel Framework and Systematic Review. *Elements in Public and Nonprofit Administration*. (Chapter 1 only)

Recommended Readings:

- Berry, Frances S., Ralph S. Brower, Sang Ok Choi, Wendy Xinfang Goa, HeeSoun Jang, Myungjung Kwon, and Jessica Word. 2004. Three Traditions of Network Research: What the Public Management Research Agenda Can Learn from Other Research Communities. *Public Administration Review* 64 (5):539-552.
- Brass, Daniel J., Joseph Galaskiewicz, Henrich Greve, R., and Wenpin Tsai. 2004. Taking Stock of Networks and Organizations: A Multilevel Perspective. *The Academy of Management Journal* 47 (6):795-817.
- Bryson, John M., Barbara C. Crosby, and Melissa Middleton Stone. 2015. Designing and Implementing Cross-Sector Collaborations: Needed and Challenging. *Public Administration Review* 75 (5):647-663.
- Kilduff, Martin, and Daniel J. Brass. 2010. Organizational Social Network Research: Core Ideas and Key Debates. *The Academy of Management Annals* 4 (1):317-357.
- Lecy, Jesse D., Ines A. Mergel, and Hans Peter Schmitz. 2013. Networks in Public Administration. *Public Management Review*:1-23.
- Lemaire, R. H., Mannak, R. S., Ospina, S. M., & Groenleer, M. (2019). Striving for State of the Art with Paradigm Interplay and Meta-Synthesis: Purpose-oriented Network Research Challenges and Good Research Practices as a Way Forward. *Perspectives on Public Management and Governance*, 2(3), 175-186.
doi:10.1093/ppmgov/gvz010
- Loeffler, Elke. 2016. "Public Governance in a Network Society." In *Public Management and Governance*, edited by Tony Bovaird and Elke Loeffler, 207-222. London: Routledge.
- O'Leary, Rosemary, and Nidhi Vij. 2012. Collaborative Public Management: Where have we Been and Where are we Going? *The American Review of Public Administration* 42 (5):507-522.
- O'Toole, Laurence J., Jr. 1997. Treating Networks Seriously: Practical and Research-Based Agendas in Public Administration. *Public Administration Review* 57 (1):45-52.
- Powell, Walter W. 1990. Neither Market Nor Hierarchy: Network Forms of Organization. *Research in Organizational Behavior* 12:295-336.
- Whetsell, T. A., & Siciliano, M. D. (2025). Applied causal inference in public sector networks. *Public Administration Review*. Advance online publication. <https://doi.org/10.1111/puar.70009>

Week 2 – September 3

Topics: Network types, actors, and structures.

Readings:

- Koliba et al. Chapters 3, 4, 5, & 6 (you can skim these)
- Carboni, J. L., Saz-Carranza, A., Raab, J., & Isett, K. R. (2019). Taking dimensions of purpose-oriented networks seriously. *Perspectives on Public Management and Governance*, 2(3), 187–201.
<https://doi.org/10.1093/ppmgov/gvz011>

- Nowell, B., & Milward, H. B. (2022). Apples to Apples: A Taxonomy of Networks in Public Management and Policy. *Elements in Public and Nonprofit Administration*. (Pages 1 – 22 only)
- Provan, Keith G., and Patrick Kenis. 2008. Modes of Network Governance: Structure, Management, and Effectiveness. *Journal of Public Administration Research and Theory* 18 (2):229-252.

Recommended Readings:

- Comfort, Louise K., and Naim Kapucu. 2006. Inter-organizational coordination in extreme events: The World Trade Center attacks, September 11, 2001. *Natural Hazards* 39 (2):309-327.
- Fung, Archon. 2006. Varieties of Participation in Complex Governance. *Public Administration Review* 66:66-75.
- Henry, Adam Douglas, Mark Lubell, and Michael McCoy. 2011. Belief Systems and Social Capital as Drivers of Policy Network Structure: The Case of California Regional Planning. *Journal of Public Administration Research and Theory* 21 (3):419-444.
- Henry, Adam Douglas. 2011. Ideology, Power, and the Structure of Policy Networks. *Policy Studies Journal* 39 (3):361-383.
- Kim, Younsung, and Nicole Darnall. 2016. Business as a Collaborative Partner: Understanding Firms' Sociopolitical Support for Policy Formation. *Public Administration Review* 76 (2):326-337.

V. OTHER RULES AND RESOURCES

Policy for Missed or Late Work: Assignments and papers are expected to be submitted on time. The schedule is also designed to help you manage your workload and it is hard to keep up with the class material if you fall behind on assignments and readings. That said, life happens. Late work may be accepted if you communicate with me beforehand. Please ask for an extension before the due date and indicate when you plan to submit the work.

Attendance and Participation Policy: Please email me if you face an unexpected situation that may impede your attendance or timely completion of assignments. Attendance each week and active participation in class discussions and exercises is expected.

Community Agreement/Classroom Conduct Policy: This class centers on discussion and analysis. As such, it is important that you are respectful of others in the classroom. Please be sure to turn off and silence cell phones. Cell phones are not to be out during the class. Studies have shown your cognitive capacity is reduced by just having your smartphone sitting out next to you. Having and using your phone not only lowers your ability to learn and your likelihood of success in a class, but it also harms the learning of those around you. As a member of this classroom, I also expect all of us to engage in professional dialogue; debate concepts and ideas but not individuals; and be willing to work together to help one another and share study strategies and other useful information.

Academic Integrity: As an academic community, UIC is committed to providing an environment in which research, learning, and scholarship can flourish and in which all endeavors are guided by academic and professional integrity. All members of the campus community—students, staff, faculty, and administrators—share the responsibility of ensuring that these standards are upheld so that such an environment exists. Instances of academic misconduct by students shall be handled pursuant to the Student Disciplinary Policy. The Student Disciplinary Policy is available online at <https://dos.uic.edu/wp-content/uploads/sites/262/2018/10/DOS-Student-Disciplinary-Policy-2018-2019-FINAL.pdf>.

Use of ChatGPT and other Generative Artificial Intelligence: The use of AI writing tools (including, but not limited to, ChatGPT, Bard, or Sudowrite) is NOT permitted in this course. Why are they prohibited? The answer is simple. I want you to think for yourself. What do you think a particular theory? How valid was the analysis or the conclusion the authors reached? How should we measure the success of a network? You can ask ChatGPT all of these and it will give you an answer. But you didn't learn anything. You didn't think for yourself about how your worldview and opinions shape what how you understand issues of accountability, collaboration, contracting for government services, etc. These are tough topic and we need a diversity of ideas and insights. So don't let ChatGPT think for you. The thinking is the hard part and the fun part. It is also the part that connects you as an individual to the material and helps you better understand what you are learning and how it connects to your life, your community, and the broader world. These tools are wonderful for other things; you should explore them and consider how they impact your world. But in terms of this class, leave the thinking to the humans and not the AI.

Special Needs: UIC and the Department of Public Administration are committed to maintaining a barrier-free environment so individuals with disabilities can fully access programs, services and all activities on campus. The Office of Disability Services works to ensure the accessibility of UIC programs, classes, and services to students with disabilities. Services are available for students who have documented disabilities, including vision or hearing impairments and emotional or physical disabilities. Students with disability/access needs or questions may contact the Office of Disability Services at (312) 413-2183 (voice) or (312) 413-0123 (TTY only). Please feel free to contact me if you need any special accommodations.

Diversity and Inclusion: It is my goal that people from diverse backgrounds and perspectives be included in and served by this course, the Department of Public Administration, and the University of Illinois at Chicago. I believe that the diversity that the students bring to this class is a resource that can be used to improve student learning and perspectives. Course materials and activities are designed to be respectful of all types of diversity: gender identity, sexuality, disability, age, socioeconomic status, ethnicity, race, nationality, religion, values, and culture. It is my intent that this class be an environment where all students feel safe to express their perspectives and opinions. Please let me know if something said or done by me, the TA, guest lecturers, or other students, is troubling or causes discomfort or offense. If this occurs, please feel free to discuss the situation with me privately, to raise your concern in class, or to let

me know about the issue through a trusted sources (e.g., another student or faculty member or your academic advisor).

Campus Advocacy Network: Under the Title IX law you have the right to an education that is free from any form of gender-based violence and discrimination. Crimes of sexual assault, domestic violence, sexual harassment, and stalking are against the law and can be prevented. For more information or for confidential victim-services and advocacy contact UIC's Campus Advocacy Network at 312-413-1025 or visit <http://can.uic.edu/>. To make a report to UIC's Title IX office, contact Rebecca Gordon, EdD at TitleIX@uic.edu or (312) 996-5657.

~Hope you Enjoy the Course~
